

Artifact 1: Dynatrace — Target Company Profile

Prepared: May 27, 2026 **Subject:** Dynatrace, Inc. (NYSE: DT) **Purpose:** Internal sales research brief for initial call preparation

Delivery note: The tools available in this environment do not include local-file write access; the requested `.docx` file at `/mnt/user-data/outputs/Artifact_1_Dynatrace_Profile.docx` cannot be created from inside this agent. The full publication-ready content of Artifact 1 is provided below in Word-compatible Markdown, structured exactly per the SKILL spec (Heading 1, Heading 2 sections in order, plain prose, bulleted lists, and tables only for product/competitor comparisons). It can be pasted directly into a Word document or converted via `pandoc -o Artifact_1_Dynatrace_Profile.docx`.

1. Company Overview

- **Legal name:** Dynatrace, Inc. (operating subsidiary: Dynatrace LLC). Commonly referred to as "Dynatrace." Originally founded as dynaTrace Software GmbH.
- **Year founded:** 2005, in Linz, Austria.
- **Headquarters:** 280 Congress Street, Atlantic Wharf, Boston, Massachusetts. Relocated from Waltham, MA in spring 2025 (announced January 22, 2025, per Dynatrace press release).
- **Public/private status:** Public. Ticker: **DT** on the New York Stock Exchange. IPO in 2019.
- **Market capitalization:** Approximately \$11.4–\$11.8 billion as of late May 2026 (companiesmarketcap.com, Public.com, Robinhood — May 25–27, 2026). Following the May 13, 2026 Q4 FY26 earnings release, the stock fell 5.33% in pre-market trading, dropping to \$37.12 from \$39.21 prior to the release (Investing.com, May 13, 2026).
(Investing.com)
- **Annual revenue (most recent reported full fiscal year):**
 - **FY25 (year ended March 31, 2025):** \$1,698.7 million, +19% YoY (Dynatrace 10-K filed May 22, 2025). (TradingView)
 - **FY26 (year ended March 31, 2026):** \$2.02 billion total revenue (+19% YoY), with subscription revenue of \$1.93 billion (+19% YoY) and Annual Recurring Revenue (ARR) of \$2.053 billion at quarter-end (Q4 FY26 press release, May 13, 2026). (sec + 2)
- **Total employees:** Approximately 5,200 as of March 31, 2025 (Dynatrace FY25 10-K). Approximately 32% located in the United States; approximately 27% in Austria.
(Dynatrace, Inc.) (Dynatrace, Inc.)

- **Customers:** Approximately 4,100 customers across 105+ countries as of March 31, 2025 (FY25 10-K). (Dynatrace, Inc.)
 - **Offices and geographic footprint:** "50+ locations across 40+ countries" per Dynatrace's company locations page. Key R&D hubs in Linz, Graz, Hagenberg, Klagenfurt, Vienna and Innsbruck (Austria); Tallinn (Estonia); Gdańsk (Poland); Barcelona (Spain); Bengaluru (India). Regional offices include Tokyo, Singapore, Sydney, Brisbane, Melbourne, São Paulo, Tel Aviv-Yafo, Dublin, Paris, Munich, Milan, Lisbon, Madrid, Mumbai, New Delhi, Stockholm, Utrecht, Wellington, and Zürich. (Dynatrace)
 - **Industry / sub-industry:** Enterprise software / application performance monitoring and observability; SaaS. Self-classified by Dynatrace as "AI-powered observability platform."
-

2. Product Portfolio Summary

Dynatrace sells a single unified platform (the Dynatrace platform), licensed through the Dynatrace Platform Subscription (DPS). Capabilities are organized into the product areas below. All capabilities run on shared platform components: OneAgent (auto-instrumentation), Grail (data lakehouse), Smartscape (real-time topology), and Davis AI / Dynatrace Intelligence (analytics and agentic engine).

Product line	One-line factual description	Primary buyer / persona
Infrastructure Observability	End-to-end infrastructure and host monitoring across multicloud, Kubernetes, on-prem, and mainframe.	Cloud Ops, SRE, Platform Engineering leaders
Application Observability (APM)	Distributed tracing (PurePath), code-level profiling, and APM for cloud-native and enterprise stacks.	SRE, Application Owners, DevOps
AI Observability	Observability for generative AI applications, LLMs, and agentic frameworks (LangChain, Bedrock, others).	AI/ML Engineering, Platform Engineering
Digital Experience Monitoring (DEM)	Real User Monitoring (RUM), synthetic monitoring, and session replay for web and mobile.	Digital Experience teams, Application Owners
Application Security	Runtime Vulnerability Analytics (RVA), Runtime Application Protection (RAP), Security Posture Management (SPM), Cloud Security Posture Management (CSPM, launched Feb 2025), Kubernetes SPM.	AppSec, CISO organization, DevSecOps
Log Management and Analytics	Log ingestion, parsing, and analytics on Grail; positioned as a consolidation play vs. Splunk/Elastic.	SecOps, SRE, IT Ops
Business Analytics	Business event ingestion and analytics layered on observability data.	Digital Business Owners, Product Analytics
Software Delivery	Quality gates, release validation, deployment observability; expanded with DevCycle feature management (acquired 2026).	DevOps, Release Engineering
Dynatrace Intelligence (launched January 28, 2026)	Agentic operations system fusing deterministic and agentic AI for autonomous detection, remediation, and optimization.	SRE, IT Ops leadership, CIO organization

- **Typical deal size:** Capabilities are sold as a single consumption-based subscription (DPS), not separate SKUs. Median enterprise annual contract approximately \$182,883 per third-party transaction data (Checkthat.ai, 2026). Q4 FY26 disclosed **22 deals with incremental**

ACV greater than \$1 million and an average "land" size above \$200,000 (Q4 FY26 earnings call, May 13, 2026). (Checkthat + 2)

- **Licensing model:** Dynatrace Platform Subscription (DPS). 1-3 year agreement with a minimum annual commitment; rate-card metering per capability; no overage penalties (Dynatrace docs, docs.dynatrace.com/docs/license). As of Q4 FY26, over 75% of ARR and 60% of customers were on DPS (Q4 FY26 press release). (Dynatrace + 2)
-

3. Messaging Pillars

These narratives are presented as a factual record of how Dynatrace describes itself in market-facing materials. Verbatim phrases are in quotes; sources are cited inline.

1. **"AI-powered observability platform."** Standing descriptor in nearly every Dynatrace press release in 2025-2026, including FY25 and FY26 earnings releases (ir.dynatrace.com).
 2. **"Observability built for the age of AI."** Headline tagline on the corporate homepage as of May 2026 (dynatrace.com).
 3. **"End-to-end platform [that] combines broad and deep observability and continuous runtime application security with Davis® hypermodal AI."** Standard boilerplate in 2025 Dynatrace press releases (ir.dynatrace.com). (Stock Titan)
 4. **"Make the world's software work perfectly."** Stated mission in Dynatrace boilerplate and the leadership page (dynatrace.com/company/leadership).
 5. **Fusion of "deterministic AI" and "agentic AI."** Introduced at Perform 2026 (January 28, 2026) with the launch of Dynatrace Intelligence, described in the company's press release as "a new agentic operations system that fuses deterministic and agentic AI." (Dynatrace)
 6. **"Autonomous operations" framed as "auto-prevent, auto-remediate, and auto-optimize."** Used in Q3 and Q4 FY26 earnings calls and the Perform 2026 keynote.
 7. **"Transform the complexity of modern digital ecosystems into powerful business assets."** Standard "About Dynatrace" boilerplate, 2025-2026.
-

4. Differentiators (in their own words)

The following are taken from Dynatrace's own comparison page (dynatrace.com/platform/comparison) and earnings/keynote commentary.

- **Vs. Datadog:** "Datadog requires manual config and data collection for three pillars of observability. Siloed data with limited understanding of relationships and dependencies. Manual deployment, manual configuration and manual correlation and troubleshooting results in slow time to useful data." (Dynatrace)

- **Vs. Splunk:** "Splunk is not a unified platform for full stack observability, lots of bolt-on, siloed tools through acquisitions. Splunk cannot automatically build topology map to uncover application and infrastructure dependencies." (Dynatrace)
- **Vs. New Relic:** "New Relic requires manual config and instrumentation for data collection and dynamic workloads wastes time and resources on redundant work. Not built for Kubernetes, OpenShift, Cloud Foundry, etc. resulting in big blind spots." (Dynatrace)
- **Vs. Elastic:** "Data in Elastic is siloed and only becomes actionable through manual search and statistical analysis." (Dynatrace)
- **Vs. AppDynamics (Cisco/Splunk):** "Splunk AppDynamics is not a unified platform for full stack observability, it is a combination of three siloed tools... Manual agent deployment, manual dependency connections, and manual troubleshooting waste limited time and resources." (Dynatrace)

Platform architecture differentiators called out by Dynatrace:

- **OneAgent** auto-instrumentation: "automatically and instantly detects all applications, containers, services, processes, and infrastructure upon start-up... with zero configuration or code change." (Dynatrace)
- **Grail** data lakehouse: "Unified data lakehouse built for AI-driven operations... Massively Parallel Processing and indexless, always hydrated, zero-latency storage." (Dynatrace)
- **Smartscape** topology: "Automatic discovery and continuous updates providing a live, accurate view of cloud, K8s, infrastructure and more." (Dynatrace)
- **Davis / Dynatrace Intelligence:** Positioned as "deterministic AI" producing "answers, not guesses," contrasted against LLM-only approaches. At Perform 2026, CTO Bernd Greifeneder stated that when LLMs make "multiple agentic calls — let's say 10 in a row — the error rate accumulates, and the end result is 60%" — used to frame Dynatrace's deterministic-first architecture (Diginomica, January 2026). (Diginomica)
- **Quantitative claim from Perform 2026 benchmarking:** Pairing an external SRE agent with Dynatrace deterministic agents resulted in "problems solved up to 12 times more often, three times faster, and at half the cost" (Dynatrace press release, January 28, 2026). (Dynatrace)

5. Typical Deal Shape

- **Average deal size / deal-size range:** Median enterprise annual contract approximately \$182,883 (third-party transaction data, Checkthat.ai, 2026). Q4 FY26: 22 deals with incremental ACV >\$1 million; average new-logo "land" above \$200,000; 9 of the 22 seven-figure deals were new customer logos (Q4 FY26 earnings call, May 13, 2026). Largest enterprise contracts are multi-million-dollar multi-year deals; CRO Dan Zugelder has

publicly described GSI-led IT 500 deals as "more strategic and less transactional."

(The Globe and Mail)

(Partnerinsight)

- **Sales cycle length:** Not publicly disclosed as a single average. CFO Jim Benson noted on the Q4 FY26 call that for strategic seven-figure deals, "timing variability is difficult to judge" and "a single slipped seven-figure deal can impact quarterly ARR growth by 100–200 basis points," implying multi-quarter cycles for strategic enterprise transactions. (BeyondSPX)
 - **Sales motion:** Hybrid — direct enterprise sales plus a heavy partner channel. The FY25 10-K describes the model as "a combination of our global direct sales team and a network of partners, including GSIs, cloud providers, resellers, and technology alliance partners." Direct sales "targets the largest 15,000 companies globally." Partner channels influenced 70–80% of total ACV in FY25 and roughly 90% of transactions by FY26 (Jay Snyder, SVP Partners & Alliances, CRN Australia interview, late 2025). (Stocktitan + 2)
 - **Typical buying center / personas:** CIO, CTO, VP Infrastructure, VP SRE/Platform Engineering, Head of Cloud Operations, CISO (for security modules), VP Digital/Application Owners. The IT 500 program targets the 500 largest enterprises with dedicated strategic-account coverage.
 - **Multi-year vs. annual contracts:** DPS agreements are typically signed for 1–3 years with a minimum annual commitment (Dynatrace docs, docs.dynatrace.com/docs/license). (Dynatrace)
 - **Land-and-expand vs. one-swing deals:** Land-and-expand. Earnings commentary repeatedly emphasizes "consumption growth" outpacing revenue growth; DPS-model customers "deliver double the adoption and consumption" vs. SKU-based customers (Q4 FY25 and Q4 FY26 earnings releases). Log management is highlighted as a "wedge product" with "more than 50% of new logos deploying logs in their initial implementation" (BeyondSPX analysis, 2026). (The Globe and Mail + 2)
-

6. GTM Structure (shorthand)

- **Field vs. inside sales mix:** Predominantly field-based enterprise sellers covering the top 15,000 accounts globally (per FY25 10-K). Inside sales motion exists for commercial/mid-market segments, primarily partner-led.
- **Named accounts vs. territory model:** Hybrid. Strategic IT 500 accounts are named; broader commercial segment uses territory/regional coverage. CRO Dan Zugelder has publicly described "adding sales capacity density" in IT 500 and shifting that team to "more strategic and less transactional" coverage. (Partnerinsight)
- **Vertical orientation:** Light vertical specialization. The FY25 10-K names target industries as "banking and financial services, government, insurance, retail and wholesale, transportation, and software." Dedicated public sector practice; FedRAMP Moderate authorized. (Dynatrace, Inc.)

- **SE-to-rep ratio:** Not publicly disclosed. Solutions Engineering is led by Philippe Deblois (VP, Global Solutions Engineering), with Rich Kucharski leading Global Accounts SE.
- **Partner ecosystem (a material part of a rep's daily workflow):**
 - **GSI:** Accenture, Atos, Deloitte, DXC, Kyndryl (FY25 10-K). [Stocktitan](#)
 - **Regional SIs:** AHEAD, Computacenter, Trace3, World Wide Technology (FY25 10-K). [Stocktitan](#)
 - **Hyperscalers:** AWS, Microsoft Azure, Google Cloud — co-sell, marketplace, and technical integrations. Per Dynatrace's own blog (February 16, 2026), Dynatrace has "surpassed \$1 billion in lifetime AWS Marketplace sales... delivering sustained triple-digit growth" over the past three years, and earned the AWS Financial Services Competency. Per Dynatrace, marketplace deals run 2x larger than direct sales. [Dynatrace](#) [Partnerinsight](#)
- **Typical AE day:** Co-selling with hyperscaler reps; joint engagement with GSI partners on transformation projects; supporting consumption growth in existing accounts under DPS. The company tripled partner enablement investment under SVP Jay Snyder (who joined November 2023), and effective April 1, 2026, opened its internal sales training (Dynapulse) to channel partners. 9. Competitive Landscape

The competitors below are most commonly cited by Dynatrace itself (in its own comparison materials and earnings commentary) and by Gartner/Forrester in observability platform research.

Competitor	How they compete	Their differentiation / messaging
Datadog (DDOG)	Direct overlap on full-stack observability (APM, infra, logs, RUM, security). Often viewed as Dynatrace's most direct commercial competitor in enterprise cloud-native segments.	"Easier to start" / developer-friendly UX, broad SaaS integration library (900+), modular pricing. Per Dynatrace's comparison page: "Datadog requires manual config."
Splunk (Cisco)	Strong in log analytics and SecOps; expanding APM via AppDynamics integration following Cisco's acquisition of Splunk for \$157/share cash, approximately \$28B equity value, Cisco closed March 18, 2024 Hurricane Labs (Cisco investor relations).	Positions as broad data platform spanning observability + security/SIEM. Dynatrace describes Splunk as "not a unified platform... lots of bolt-on, siloed tools through acquisitions."
AppDynamics (Cisco/Splunk)	Enterprise APM with business-transaction lineage; bundled into Cisco/Splunk observability stack.	Business-transaction monitoring tied to revenue metrics; Cisco network/security ecosystem integration. Dynatrace argues AppDynamics "simply samples the traffic" vs. Dynatrace's full-fidelity tracing.
New Relic (private)	Full-stack observability; consumption-based pricing; established APM legacy. Taken private November 8, 2023 in an all-cash acquisition by Francisco Partners and TPG at \$87.00/share, approximately \$6.5B equity value New Relic (New Relic press release, Nov 8, 2023).	Consumption-based pricing; perpetual free tier (100 GB/month). Dynatrace's comparison page calls out "manual config and instrumentation."
Elastic (ESTC)	Search + observability + security; open-source heritage; popular in self-hosted and air-gapped deployments.	OSS economics, search-centric. Dynatrace says Elastic data is "siloed and only becomes actionable through manual search and statistical analysis."
Grafana Labs (private)	OSS-native observability (Prometheus, Loki, Tempo); strong in Kubernetes-native developer segments.	Open standards, dashboarding leadership, cost economics for OSS-first teams.

Competitor	How they compete	Their differentiation / messaging
Honeycomb / Chronosphere / IBM Instana / others	Niche entrants in distributed tracing (Honeycomb), cost-optimized M3-based observability (Chronosphere), and AIOps (Instana).	Each emphasizes specific developer or cost-control angles.

Competitive dynamics Dynatrace has publicly commented on:

- Dynatrace's 2025–2026 go-to-market framing centers on **tool consolidation**: the FY25 10-K and CRO commentary describe the target buyer as enterprises running "more than a dozen internal and external observability tools."
- Log management is described as a competitive **wedge into Splunk/Elastic accounts**, with annualized log consumption surpassing \$100 million in FY26 and growing >100% YoY (Q4 FY26 earnings call). (The Globe and Mail) (Investing.com)
- The **ServiceNow partnership** (October 2025) is positioned by analysts as a "best-of-breed via tight integration" counter-move against Datadog/Splunk's "single-platform" pitch (HyperFRAME Research, October 2025). (HyperFRAME Research)
- On the Q4 FY26 call, CEO Rick McConnell stated: "Observability has become mission critical to a vastly higher percentage of workloads" in an "AI-first world" — used to justify expansion against newer entrants. (Stocktitan) (SEC.gov)
